

The Berkeley Bulletin

Volume 4

ENGN's Agenda:

The Engineers are starting out with Sea Perch design, then they're off to ropes course, and will end their day with a sweet ice cream social!

HEAL's Deal:

Today, Medicine students will hear from two guest lecturer's: Dr. Cadet, and Dr. Elkin. And they will end the afternoon with clinical rounds and public health intervention!

BIOT's Business:

Biotech students are off to the ropes course in the morning, then they have their CAD series, and end the day with an ice cream social!

Today's Distinction: Leaders Have A Powerful Vision

The word "Vision" is often considered synonymous with many other words or phrases, such as dream, goal, or mission, just to name a few. However, the meaning of the word Vision is very unique. A "Visionary" is someone who brings the future into the present. He/she is a pioneer who "stands in the future" as if it has already occurred, not as if they hope it will someday. True leaders are convinced that the reality of their creation will show up in measurable results. They continually recognize the power of positive imagery (sometimes walking through in their mind's eye the step by step process that will lead to their goal). But their real difference is much more distinct. True leaders develop ideas that most others never imagine, ideas that in some way, when created, are a benefit to mankind. Many people have flashing images of an idea that may seem to be, at that moment, extraordinary. But what usually happens is the idea becomes a fantasy—a "nice idea" that might happen but probably won't. Leaders take an ordinary idea and turn it into a burning desire, or vision, which becomes contagious to those around them.

Comm's Corner

Journalism, Film, and Media Arts students have newsroom prep, comm workshops, and casino night in the evening!

Featured Staff Member: Dominick DeVincenzo

Dominick is from Harrisburg Pennsylvania and is currently a student at the University of Pittsburgh. He is a pre-med student majoring in chemistry and minoring in Italian. At school he's in the Pitt Chemistry club, the Italian club and the crossfit club. The previous few summers, he has worked as a camp counselor at a summer day camp for kids with parents in the military. He attended the NSLC's medicine and health care program as

a high school student and is excited to come back as a TA for the biotechnology program. Outside of school, Dom plays the guitar, likes to fish, and plays lacrosse.
