

# The Berkeley Bulletin

Volume 4

## ENGN's Agenda:

The Engineers will do their Product Pitch, hear from Mr. Rod Begbie, participate in What I've Discovered, and then enjoy a farewell social!

## HEAL's Deal:

Today, Medicine students will hear the medical career mashup presentation, have public health intervention, clinical diagnostics, What I've Discovered, and of course, a farewell social!

## BIOT's Business:

Biotech students will participate in robo-roach, incubator, and What I've Discovered. They will end their evening with a farewell social!

## Today's Distinction: Leaders Develop Leadership in Others

Leaders know that they have mastered something when they are able to help someone else master it. This is not only an art form, but also the truest test of leadership. Leaders realize that there is no worthwhile goal that one person achieves by himself or herself. Leadership implies teamwork. It involves building on the strength in numbers, and causing each individual to work together as one. Leaders are natural team builders who maximize human potential. They recognize the abilities that people do not see in themselves and move them towards developing those abilities. Leaders develop winning teams. They understand that teamwork is not simply about everyone "doing their part." A team is not an assembly line that stops when one piece breaks down, but rather an organized structure of individuals who are each working in harmony towards a common goal. Leaders understand that the whole is greater than the sum of its parts, but that each part is a necessary component towards success. They lead by example and in doing so teach others how to win.

## COMM'S Corner

Journalism, Film, and Media Arts students will continue to discover the world of communication, have class work time, and the correspondence ball!

## Featured Staff Member: Dany Keiser

Dany Keiser is an awesome human, and an office assistant here at the Berkeley site. She is an English Literature and American History double major at the University of Mississippi and focuses her studies in the area of Women's History in the 20th Century Southern United States. She is a member of the Sally McDonnell Barksdale honors college, an executive board member for the university's Children's Miracle Network dance marathon (RebelTHON), and a founding member of the Iota Omega chapter of Alpha Phi Fraternity. In her

free time, she enjoys drinking REAL sweet tea, attending her friends' weddings, eating soup, watching *Game of Thrones* and listening to musical theater (particularly Hamilton!)

## Featured Student: Claire Alegria

Claire Alegria is an Engineering student student from Vallejo, California. She loves engineering because her dad is an engineer and she was always interested in what he was working on. In addition, she thinks it is really cool how engineering can change the entire world, even if it stems from something simple.
